

CSeametry is a consultancy dedicated to providing affordable, enterprise-grade data intelligence and automation for small businesses. The organization positions itself as a bridge between complex data and actionable growth, focusing on optimizing workflows and empowering teams through modern technology.

Services Provided

CSeametry offers a comprehensive suite of solutions designed to solve specific business challenges:

- **AI & Business Automation:** Implementing scalable AI architectures to handle repetitive tasks, aimed at reclaiming significant weekly operational time (often 20+ hours).
- **Data Analysis & Consulting:** Transforming raw data into strategic insights to drive faster decision-making (targeting a 40% improvement in decision speed).
- **Custom Dashboard Development:** Building real-time visibility tools for tracking KPIs and operational performance.
- **Corporate Training:** Upskilling internal teams to handle data analysis and AI tools in-house, reducing long-term reliance on external vendors.

The Founder

The organization is led by **Supriyo**, a **Chartered Engineer (India)**, **Data Scientist**, and **AI Engineer**. He specializes in:

- Designing end-to-end AI and data solutions for growing businesses.
- Building reliable data pipelines and decision-ready dashboards.
- Combining technical expertise in data science and automation with frontend engineering to create intuitive user interfaces.

The firm emphasizes tangible ROI, with client testimonials noting identified cost savings of over ₹2L in the first month and significant boosts in team productivity.
